Yvette Young, 2015

## Photo Journal Assignment

### General Information

For each chapter/topic we cover you are required to take one photograph that represents the topic. *Your photos should depict things you see in your everyday life, but should also illustrate a concept or concepts discussed in the text and lectures.*

Some topics may be more difficult capture in a photo. You may use photos taken by someone else three times during the semester. Make sure they are actual photographs, not illustrations, paintings or cartoons. If you use more than three photographs taken by someone else you will lose points on the assignments.

Photo journals are graded on a 10 point scale.

If you are having trouble finding something to photograph you might want to take a look at these visual sociology sites for some inspiration: [visual sociology.org](http://visualsociology.org), <http://sociologicalimagination.org/archives/category/visual-sociology>, and <http://www.racheltanurmemoialprize.org/>.
